Skin care with the SQOOM can really be beautiful. The SQOOM Luxury decorated with hundreds of Swarovski crystals. A real eye-catcher.

The future belongs to SQOOM; not only in the beauty care sector but also in treating sensitive skin and skin disorders. The SQOOM method is so successful that it is already applied by dermatologists as well as by esthetic clinics and high-class cosmetic studios. The unique IONOZYM system opens up extensive fields of application. Available exclusively in pharmacies.

the medConcept

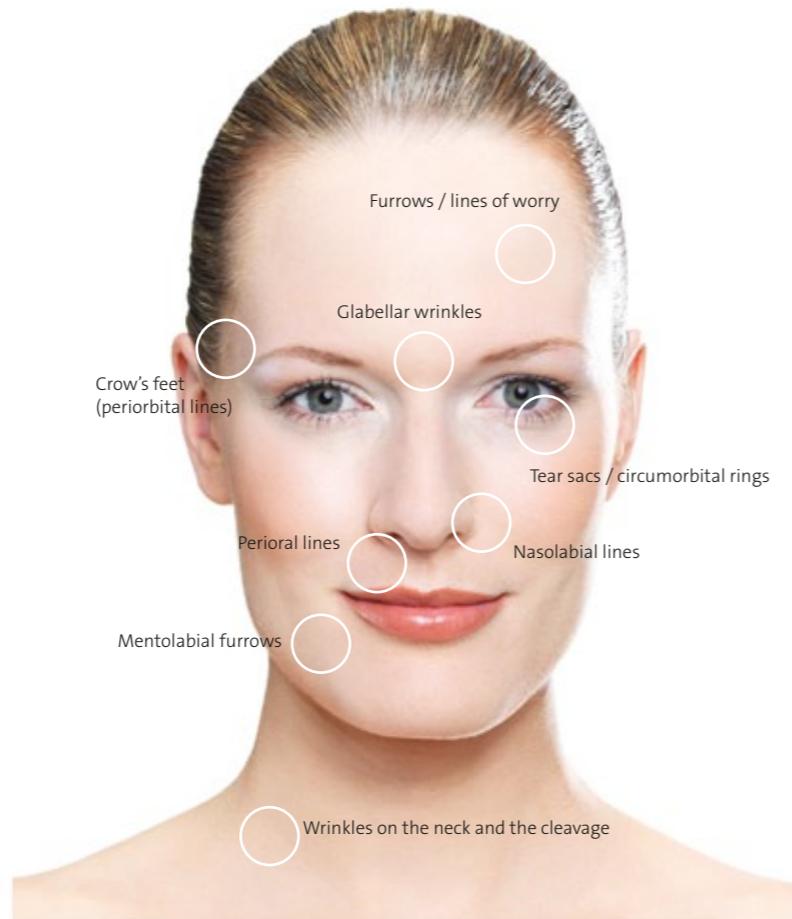

the concept of beauty

## Soft lifting at home.

As skin ages, it is subject to the on-going reduction of the moisture-retaining hyaluronic acid. Hyaluronic acid plays an important role in stabilising the skin's elastic and collagen fibres and protecting skin cells against free radicals.

**SQOOM refills this moisture store.** While you are only rinsing the leaves with conventional cosmetic products, SQOOM irrigates the deep roots without a scalpel or a needle in a soft and completely simple way.

Simply spread the SQOOM gel on to the skin surface to be treated, and massage it deeply into your skin with small circular movements using the SQOOM. Your skin will become tighter, look more youthful and increase its softness.

## Give your skin what it needs.

### xcential hyaGel

An innovative anti-aging special gel consisting of 100% skin-friendly natural effective agents. Delicate hyaluronic acid penetrates critical skin layers to fill cavities resulting from the ageing process. The gel now features a new effective formulation agent against free radicals and includes aloe vera leaf gel as an intensive moisture source.

### cleanser

For pore-deep skin cleansing. SQOOM cleanser disinfects the skin and has a gently cooling effect. Aloe vera gel moisturises the skin while panthenol and chamomile extract have a soothing effect. Negative ionisation = pore-deep purity.

### xcentialSkinCare

Innovative antiAge cream for daily care. Ideal as the final stage in the SQOOM treatment.

SQOOM is an innovative anti-aging treatment that regenerates your skin from deep within. While the SQOOM device is responsible for the transport, the SQOOM gels are responsible for the provision of the correct and effective agents.

### DeSpot

DeSpot removes pigmentary disorders (pigment and ageing spots) efficiently and highly effectively with a new combination of sulfuraphane and genistein. Accurately. Without impairing the adjacent skin surface. Aloe vera leaf gel provides the skin with intensive and long-lasting moisture.

### SQOOM is effective deep inside your skin.

SQOOM transports valuable agents deeper into the skin. The worldwide patented "Synchron Technology" features a unique combination of iontophoresis and ultrasound, regenerating the skin from within and effectively improving the skin structure – scientifically proven.
