Skin care with the SQOOM can really be beautiful. The SQOOM Luxury decorated with hundreds of Swarovski crystals. A real eye-catcher.

The innovative SQOOM concept for skin problems and sensitive skin.

The future belongs to SQOOM; not only in the beauty care sector but also in treating sensitive skin and skin disorders. The SQOOM method is so successful that it is already applied by dermatologists as well as by esthetic clinics and high-class cosmetic studios. The unique IONOZYM system opens up extensive fields of application. Exclusively obtainable in pharmacies.

The new clinically tested anti-aging concept.

the medConcept

the concept of beauty
www.SQOOM.com

Soft lifting at home.

The ageing of the skin is subject to the on-going reduction of the moisture-retaining hyaluronic acid. But the hyaluronic acid stabilizes the elastic and collagen fibers and protects the cells against free radicals.

SQOOM refills this moisture depot. And while you are only rinsing the leaves with conventional cosmetic products, SQOOM irrigates the roots without a scalpel or a needle in a soft and completely uncomplicated way.

Simply spread the SQOOM gel on to the skin surface to be treated, and massage it deeply into your skin with small circular movements using the SQOOM. Your skin will become tight, look youthful and increase its softness.

Give your skin what it needs.

xcential hyaGel

An innovative anti-aging special gel consisting of absolutely skin-friendly natural effective agents. Delicate hyaluronic acid penetrates critical skin layers to reliably fill cavities resulting from the ageing process. The gel now features a new effective formulation agent against free radicals and including aloe vera leaf gel as an intensive moisture source.

DeSpot

DeSpot removes pigmentary disorders (pigment and ageing spots) efficiently and highly effectively with a new combination of sulfuraphane and genistein. Accurately. Without impairing the adjacent skin surface. Aloe vera leaf gel provides the skin with intensive and long-lasting moisture.

cleanser

For pore-deep skin cleansing. SQOOM cleanser disinfects the skin and has a gently cooling effect. Aloe vera gel moisturises the skin while panthenol and chamomile extract have a soothing effect. Negative ionisation = pore-deep purity.

xcentialSkinCare

Innovative antiAge cream for daily care. Especially as the final stage in the SQOOM treatment.

SQOOM is an innovative anti-aging treatment that regenerates your skin from deeply within. While the SQOOM device is responsible for the transport, the SQOOM gels are responsible for the provision of the correct and effective agents.

SQOOM is effective deep inside your skin.

SQOOM transports valuable agents deeper into the skin. The worldwide patented "Synchron Technology" features a unique combination of iontophoresis and ultrasound, regenerating the skin from within and effectively improving the skin structure – scientifically proven.
